Mechatronics Engineer

Languages: Spanish (Native) | English (Advanced - C2)

Resume

Mechatronics Engineer focused on project management, quality assurance, and process optimization. Certified Lean Six Sigma Black Belt with experience in implementing industrial safety protocols, process capability analysis, and team leadership. Assertive communicator capable of facilitating complex technical training and coordinating interdisciplinary strategies to achieve productivity goals.

Professional Experience

Colegio Celta Internacional | Mathematics, Robotics, English & CAD Teacher, Counselor, and Technical Trainer Querétaro, Querétaro | August 2025 – Present

- **Innovation Training:** Delivered training sessions for teaching staff focused on the effective and efficient use of Artificial Intelligence, establishing it as a key tool for quality and timesaving to increase administrative and educational productivity.
- **Results Optimization in mathematics:** Led the implementation of a new pedagogical strategy in mathematics and calculus, achieving the best historical result in math teacher performance evaluations by students, teachers, and administrative staff during my first semester. Achieved a 0% rate of red indicators across all mathematical areas assessed by Mexico's SEP in my first school year.
- **Best ever results in EFP IB certifications:** Achieved a 100% outstanding certification rate among the 2026 cohort of the Professional Training Program in Design and Prototyping through CAD instruction.

Universidad Anáhuac Querétaro | Engineering Workshop Intern Querétaro, Querétaro | January 2025 – July 2025

- **Automation & Industrial Safety:** Directed the research phase, electrical design, and communication interface for proximity emergency stops in KUKA robot cells on the engineering workshop's production line.
- **Quality Management (Six Sigma Black Belt):** Led a comprehensive project installing Keyence SZ-V scanners and safety barriers as part of my Green and Black Belt certification in Six Sigma methodologies for continuous improvement. Executed statistical analyses to calculate process capability, establishing a baseline to reduce poor-quality costs derived from accidents and managing the fulfillment of industrial safety objectives.

- **Research and Development (R&D):** Designed in CAD (SolidWorks) and assembled a test bench for a biocompatible aortic valve, applying scientific research methodologies and technological innovation.

Personal Entrepreneurship | English Instructor & Personal Trainer August 2022 – Present

- **Administration & Customer Service:** Comprehensively managed scheduling, weekly planning, and client progress tracking, demonstrating excellent assertive communication skills and personalized attention.
- **Business Development:** Led networking strategies, continuous learning, and social media management to drive the project's growth.

Education

Universidad Anáhuac Querétaro | Bachelor's Degree in Mechatronics Engineering
August 2021 – July 2025

- **Awards:** 90% Academic Excellence Scholarship (Final GPA: 9.5), Honorable Mention, and Academic Excellence Award in Outstanding Degree.

Universidad Anáhuac Querétaro | Master's Degree in Engineering & Transformation

- Starting date: October 2nd, 2026
- Potential graduation date: September 2028

Certifications and Technical Skills

- **Methodologies & Quality:** Lean Six Sigma (White, Yellow, Green, and Black Belt), Process Optimization, Project Management.

- **Software & Technical Tools:** SolidWorks CAD, Electronic Design, G-Code Programming (CNC), MATLAB Data Analysis, PLC, Microsoft Office, Artificial Intelligence.
- **Additional Certifications:** Anáhuac General Digital Skills Program, Wadhwani Foundation NEN Program, International Baccalaureate (IB) - Career-related Programme in Entrepreneurship, SolidWorks CSWA and CSWP.
- **Soft Skills:** Leadership, Assertive Communication, Problem Solving, Logical Thinking.
